“E Com Security Academy has been established to help and support employees, from all kinds of organizations, in being more innovative and vigilant to address persistent cyber threats and to comply with regulatory requirements”.

Why E Com Security Academy?

Organizations across all industries are faced with unmanageable levels of cyber threats brought on by a changing threat landscape. The optimum strategy to respond to these threats is to make security an integral part of culture and overall structure to help organizations better prepare for digital transformation in the age of the fourth industrial revolution.

E Com Security Academy has been established to help organizations enhance security culture and meet regulatory requirements of GDPR, HIPAA, PCI DSS, FFIEC, and SOX with intuitive employee training thru our cloud-enabled learning environment customized to meet all kinds of organizations.

Using E Com Security Academy you will benefit the most from:

- Empower employees of various backgrounds with security awareness, data privacy, ethics & regulatory trainings
- improve employees' awareness and competencies to become cyber aware and actively help protect your organization against cybercrime and regulatory consequences.

- Knowledge of industry good practice approaches, so that you have the confidence that everyone with access to systems and data is being trained.
- Reduced risk of data loss or security incident through employee negligence or error.

Certification and Accreditation

E Com Security Academy enjoys a number of important certifications & accreditations.

- Academy is certified and approved by the Human Resource Development Authority for the purposes of providing courses that are eligible for Professional Development. Participants are given a Certificate of Training confirming the total number of training hours.

Developed by specialists

At E Com Security Academy, we blend technical expertise with real life experience in training development and delivery. The course content is developed by niche cyber security and privacy experts of E Com Security Solutions, a big 4 cyber security firm helping over 4000 organizations globally in across 20 industries and over 150 countries.

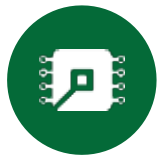

Learning on demand

Simple and effective employee training, created to accommodate different learning styles and learning on the go

Cloud-based online training

Every course is made up of an explanatory video lasting 3-5 minutes are designed for different levels of experience. Members can access the courseware at their own pace from anywhere using their laptops, phones, tablets, etc.

Inspiring video-based learning

We blend technical expertise with real life experience in training development and delivery. Our course content include Inspirational training videos, real-life scenarios, and simulations that are designed to reflect the field experience of E Com Security Solutions professionals.

Certificate of Recognition

Members will be provided with personalized Completion Certificates for each e-course and e-quiz completed. The certificates can be used to verify Continuing Professional Development and Education credits.

Digital Badge

The digital badge program is a digital recognition of skills which can be shared on social and professional networks, and can also be a part of member's digital signature. These badges are earned once member pass the exam.

Track and Monitor

Course Category – Employee Awareness

Courses designed to raise awareness on the importance of cybersecurity, and help build a security-oriented mindset among users

Security Fundamentals

The training course focus on fundamentals of information security,

including most noted cyber breaches, end user security risks, security tools and the end user's role in IT security.

Expertise Level: Beginner

Duration: 35 Minutes

Course Curriculum | 8 Trainings

▶	Course Overview
▶	IT Security Basics
▶	The CIA Security Triad
▶	End User Security Risks
▶	Cyber Breach Consequences
▶	Anti-Virus Software
▶	System Patches
▶	End User Role in IT Security
▶	Course Test

Remote Working Security

The training course focus on fundamentals on the risks associated with the remote

access and best practices specific to devices and secure remote access and configuration.

Expertise Level: Beginner

Duration: 35 Minutes

Course Curriculum | 8 Trainings

▶	Course Overview
▶	Remote Access Risks Scenario
▶	Remote Access User Considerations
▶	Security and Digital Collaboration
▶	Remote Access Operations
▶	Remote Access Best Practices
▶	E-Mail and Internet Security Best Practices
▶	Computer Security Best Practices
▶	Course Test

Social Engineering & Phishing

The training course focus on social engineering and Phishing attacks that target

victims and the best practices to protect from these attack vectors and avoid being a victim.

Expertise Level: Beginner

Duration: 40 Minutes

Course Curriculum | 8 Trainings

▶	Course Overview
▶	social engineering scenario
▶	social engineering tactics
▶	E-Mail Phishing Scenario
▶	Spot phishing attack
▶	Response to phishing
▶	Malware Types
▶	Social engineering and phishing best practices
▶	Course Test

Global Regulations

The training course establish the importance of building regulatory compliance into a

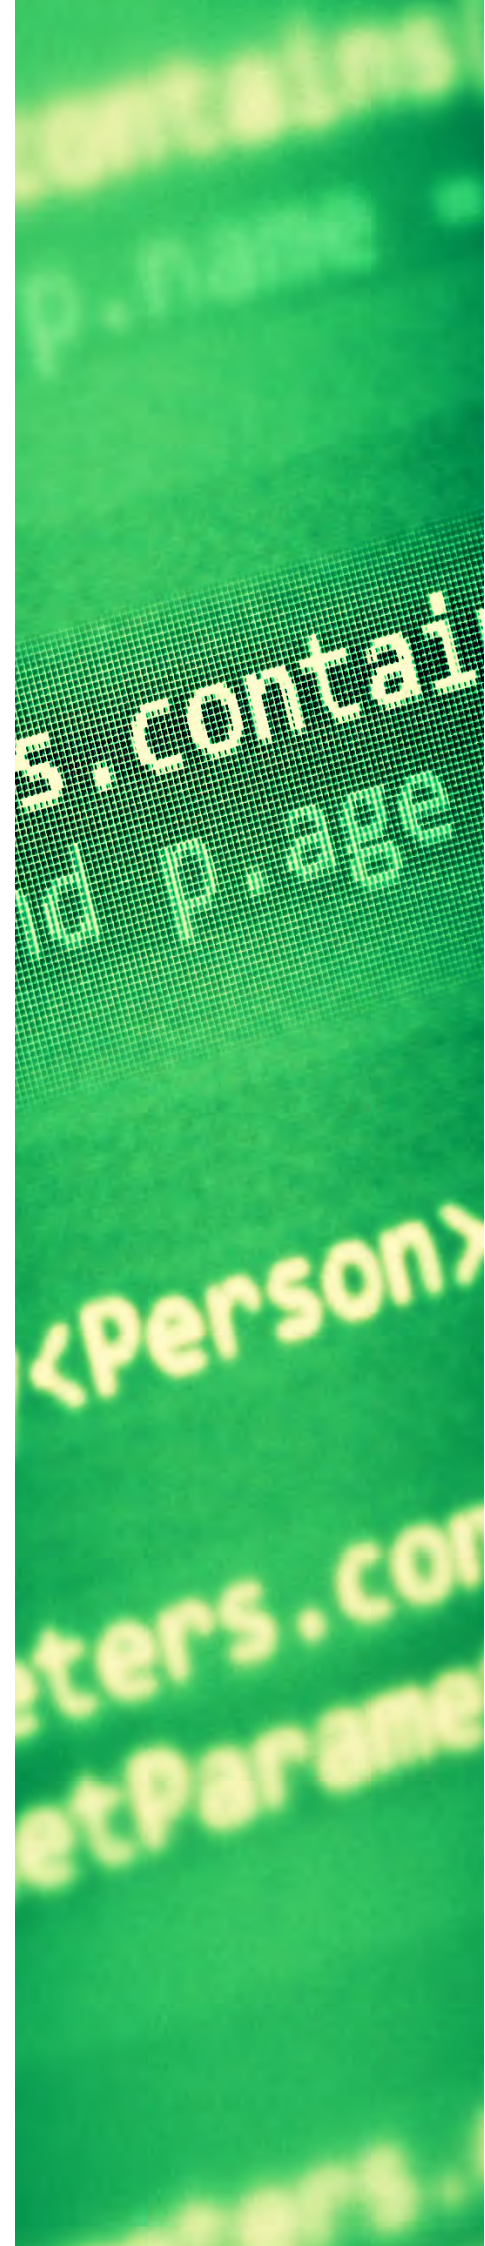

company's IT security program. The course also introduce members to various regulations including PCI DSS, GDPR, HIPAA.

Expertise Level: Beginner

Duration: 35 Minutes

Course Curriculum | 6 Trainings

▶	Course Overview
▶	Compliance with Laws and Regulations
▶	Payment Card Industry Data Security Standard
▶	Anti Money Laundering & Know Your Customer
▶	General Data Protection Regulation
▶	Health Insurance Portability & Accountability Act
▶	Course Test

Course Category – Cyber Skills

Courses aimed at improving employees' competencies and skills on Information Security governance, ethics and management

Information Governance

The training course helps organizations minimize information risks and costs while maximizing its value. Learn proven strategies, methods, & best practices for ensuring success of governance program.

Expertise Level: Intermediate

Duration: 35 Minutes

Course Curriculum | 8 Trainings

	Course Overview
	Security Policy Framework
	Information Security Policies
	Computer and Hardware Policies
	Risk Management Fundamentals
	Incident Management
	Disaster Recovery
	Physical controls
	Course Test

Privacy and Security Principles

The training course explore best practices and procedures for managing privacy, security, and risk and assessing security processes. Also covers topics of data privacy and protection practices, and security frameworks.

Expertise Level: Advanced

Duration: 35 Minutes

Course Curriculum | 9 Trainings

	Protecting Sensitive Information
	Privacy Breach Consequences
	Generally Accepted Privacy Principles
	Privacy Considerations
	Limiting Data Collection
	Classification
	Labeling and Handling
	File encryption and Access Control
	Destruction and Sanitization
	Course Test

Business Ethics

The training course focus on how employees to respond in ethically gray situations, including conflicts of interest, fear of failure, and business pressure and drives importance of business ethics.

Expertise Level: Intermediate

Duration: 35 Minutes

Course Curriculum | 8 Trainings

	Course Overview
	Intellectual Property
	Contracts and Agreements
	Data Retention
	Personnel Security
	Employee Privacy and Security
	Employment & Termination Security Procedures
	Managing Diversity and Inclusion
	Course Test

Information Risk Management

	Risk Treatment
	Penetration Testing
	Management Review
	Course Test

Course Category – Industry Practices

Courses aimed to meet mandated regulatory trainings of GDPR, PCI DSS, HIPAA, FFIEC, and SOX

PCI DSS Security

The training course targeted to end users which are designed by PCI Professionals to meet requirements of PCI DSS Standards. Course designed for both end users of merchant & service provider organizations.

Expertise Level: Advanced

Duration: 1 Hour, 15 Minutes

Course Curriculum | 17 Trainings

	Payment Card Industry Data Security Standard
	The CIA Security Triad
	Classification
	Labeling and Handling
	End User Security Risks
	Malware Types
	Information Security Policies
	Computer and Hardware Policies
	Incident Management
	Disaster Recovery
	File encryption and Access Control
	Anti-Virus Software
	System Patches
	Computer Security Best Practices
	E-Mail and Internet Security Best Practices
	Remote Access Best Practices
	End User Role in IT Security
	Course Test

FinTech Security & Regulations

The training course focus on unique cybersecurity challenges, including rules and regulations to prevent fraud and protect consumer data. This course is designed for the executives, senior leaders and the management team.

Expertise Level: Intermediate

Duration: 60 Minutes

Course Curriculum | 15 Trainings

	Compliance with Laws and Regulations
	Payment Card Industry Data Security Standard

	Anti Money Laundering & Know Your Customer
	IT Security Basics
	Security Policy Framework
	The CIA Security Triad
	Classification
	Data Retention
	Destruction and Sanitization
	Risk Assessments
	Risk Management Concepts
	Personnel Security
	Disaster Recovery
	Vendor Risk Management

GDPR Practitioner

The training course focus on on General Data Protection Regulation (GDPR) that came

into effect on 25 May 2018 and changed the European privacy landscape. Include wide range of scenarios & practical tools.

Expertise Level: Advanced

Duration: 5 Days | Instructor Led

Course Curriculum | 5 Modules

	Privacy & Data Protection Fundamentals
	Privacy Governance structures
	Stakeholder Engagement & Operations Mgmt
	Third Party Management
	Security controls, techniques & privacy mgmt.

HIPAA Security and Privacy

The training course targeted to end users which are designed by HIPAA security Professionals to meet the

requirements of HIPAA and covers threats to data security and the processes that exist for dealing with a data breach.

Expertise Level: Intermediate

Duration: 60 Minutes

Course Curriculum | 5 Trainings

	Introduction to HIPAA and Patient Privacy
	HIPAA Overview
	Complying with HIPAA
	Confidentiality Agreements
	Marketing and Promotion under HIPAA
	Course Test

Getting Access

Access is available to organizations we have signed an agreement with

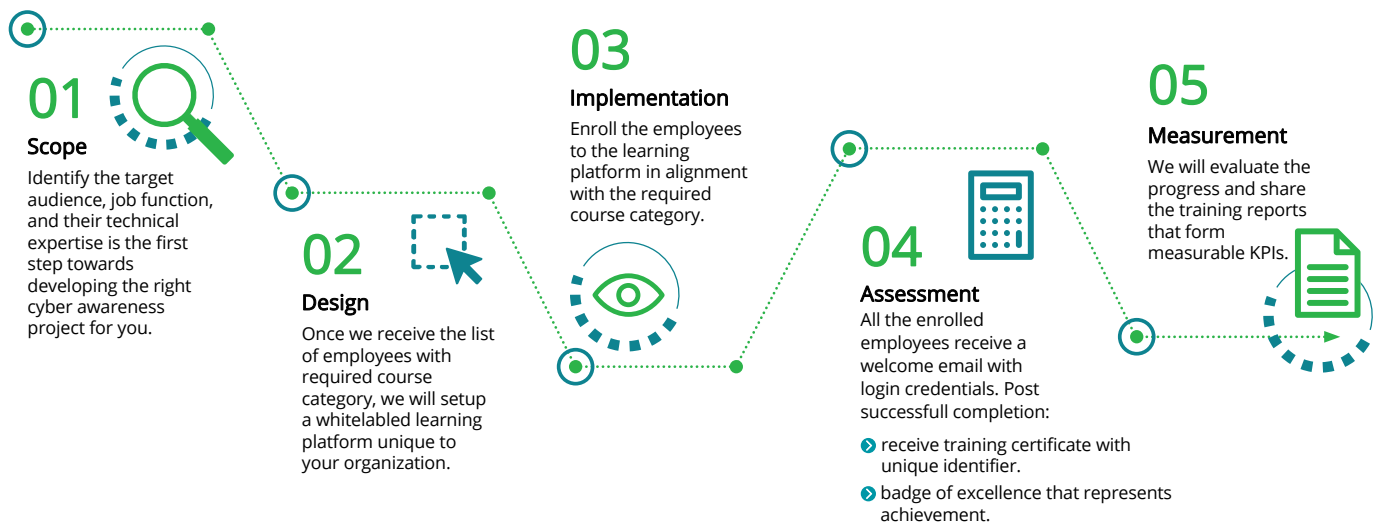

Hosting has been designed to respond to different training platform needs. On selecting the user access option, the digital training can be:

- deployed into client learning management systems as part of staff training requirements; or
- hosted on the E Com Security Academy learning platform where academy will support user rights management and administration.

Seventy-nine percent of organizations say adoption of cyber awareness trainings make themselves more secure, vigilant, and resilient when faced with cyberthreats.

E Com Security Solutions 2020 Global Human Capital Trends Report

Figure 1. Training Management Approach

Our Core Principles

Innovative approach

The Academy applies up-to-date training methods and techniques, including business games, simulations, and interactive visualization. The training has no PowerPoint slides and long complicated questionnaires - but an intuitive e-learning portal with videos and tests, where everyone can participate.

Efficiency

The training program will be managed by dedicated project management professionals who stand ready to support, manage and guide beyond the training programs. To make the training programs as effective as possible, we work from a desire to create a deep understanding of your organisation and culture.

Learning Format

e-learning programs designed to foster security awareness and build technical expertise

Employee Onboarding - Security Awareness

The e-learning courses designed to provide employees with real-time experience on a wide range of cybersecurity and data privacy concepts to help them familiarize with industry-standard methodologies from anywhere using their laptop, phone, tablets etc. The following are the key benefits:

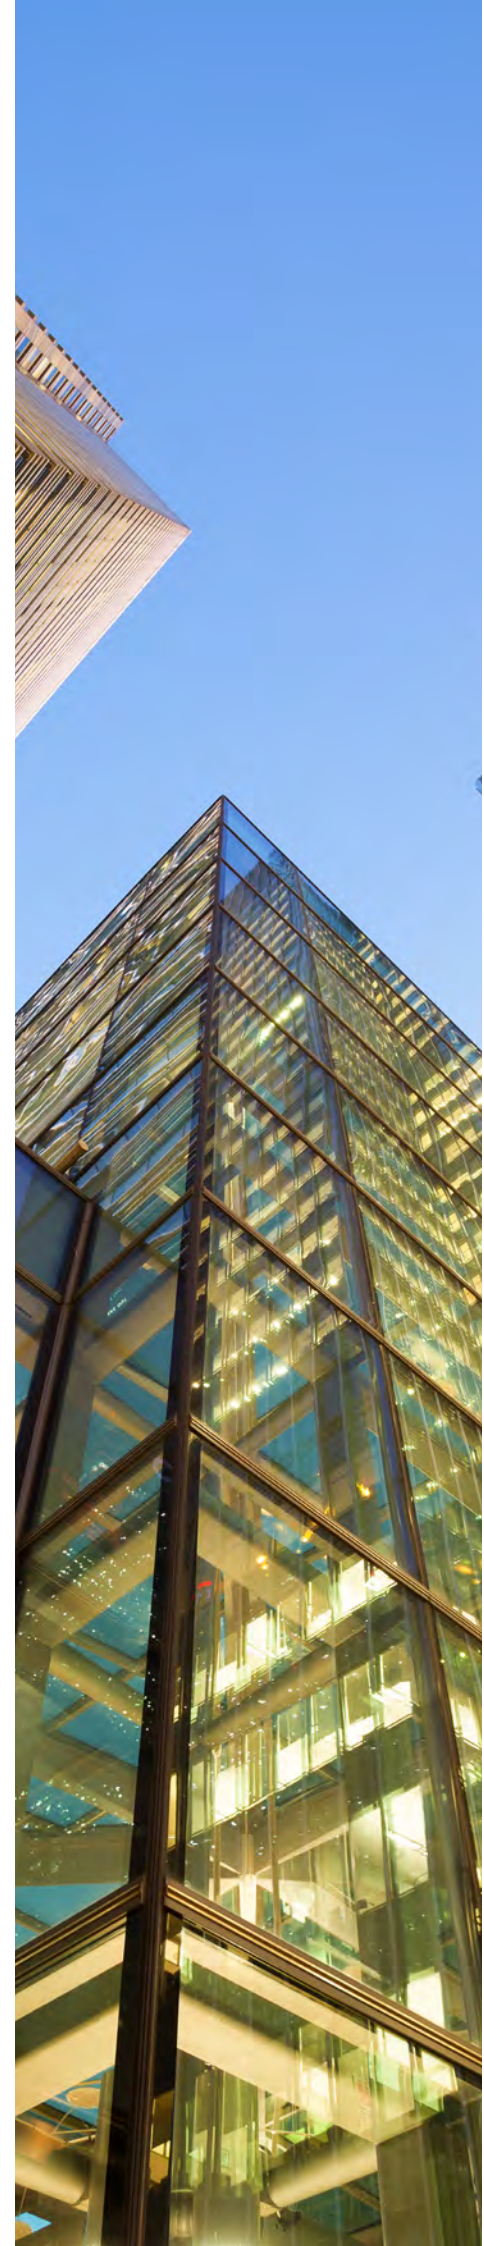

- Courses based on live industry cases from industry practitioners of E Com Security Solutions
- Professional certification by E Com Security Academy
- Develop and embed a mature cyber risk culture

Employee Upskill - Build Expertise

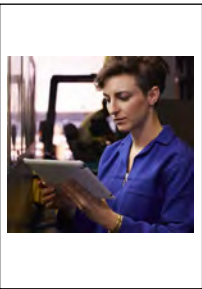

The e-learning courses specialized to build expertise on cyber security skills, and plan other initiatives needed to effect digital transformation successfully. The trainings also prepare employees for qualifications such as Certified Information Systems Auditor (CISA), and Certified Information Systems Security Professional (CISSP).

- Develop your employees professional knowledge and skills on cybersecurity and dataprivacy
- Stay informed on global laws and regulations
- Stay up-to-date on new and innovative managerial practices on security governance.
- Continuous development on best practices and procedures for managing privacy, security, and risk
